PERSONAL INFORMATION

Civil Status: Single

Languages: Cebuano(Bisaya), Filipino, English

PROFESSIONAL SUMMARY

Detail-oriented and technically proficient Full Stack Developer with demonstrated experience in designing, developing, and managing web and mobile applications. Skilled in Python, JavaScript, PHP, Dart, and SQL, with a strong emphasis on database design and administration using MySQL and SQL Server. Proven ability to build responsive and functional front-end interfaces using HTML, CSS, and Flutter while ensuring seamless integration with back-end systems and databases.

Experienced in conducting system testing and quality assurance to validate functionality, identify defects, and ensure reliable performance throughout the development lifecycle. Adept at utilizing industry-standard tools including GitHub, Figma, VS Code, XAMPP, and LucidChart to support efficient development workflows and deliver well-structured, scalable solutions. A collaborative team player with a strong commitment to producing high-quality outcomes that align with project objectives and client requirements.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, PHP, SQL, Dart
- **Web Development & Frameworks:** HTML, CSS, Flutter
- **Database Management:** MySQL, SQL Server
- **Tools, Systems & Platforms:** GitHub, Git, VS Code, XAMPP, Figma, LucidChart,

CERTIFICATES

IT Specialist: Databases | *Certiport / CertNexus (Pearson VUE)*

- Certified in database concepts, design, and management; awarded July 3, 2026 (Certificate ID: nvJ-uTnH), valid for 5 years.

EDUCATIONAL BACKGROUND

Bachelor of Science in Computer Science - Major in Cybersecurity 2023 – Present
University of Mindanao, Tagum College

Senior High School 2022 – 2023(Graduate)
Laureta National High School

- Degree Awarded with Honors
- Business Manager, Heart Teens Peer Facilitator Club

PROJECTS & SOFTWARE EXPERIENCE

SparxG — Multi-Branch Point-of-Sale Management System

Co-Developer

- Co-developed a multi-branch Point-of-Sale system, taking charge of database design, development, and table creation for centralized data management across multiple branches.
- Managed and maintained the database structure to ensure data integrity and efficient handling of inventory and sales transactions.
- Collaborated in implementing a barcode generator and scanner integration for inventory tracking and sales processing.
- Conducted thorough system testing including functional testing, validation, and quality assurance to ensure the system met requirements and performed reliably across all branches.
- Assisted in building the receipt and customer display interface to improve transaction visibility and customer experience.
- Documented test cases, identified defects, and verified fixes to maintain overall system quality throughout the development lifecycle.

AniMarket — Livestock Marketplace Mobile Application

Mobile Application Developer

- Designed and developed a full-featured livestock marketplace mobile application using Dart, Flutter, and Firebase, allowing users to post, browse, and sell livestock similar to a social marketplace platform.
- Implemented a real-time messaging and calling system enabling seamless communication between buyers and sellers within the application.
- Developed a dynamic product listing feature allowing sellers to upload livestock photos, add captions, set pricing, and adjust quantity for each listing.
- Built full CRUD functionality for marketplace posts, enabling users to create, edit, update, and delete their own livestock listings with ease.
- Integrated user profile management allowing users to view and edit their personal information and account details.
- Utilized Firebase as the back-end infrastructure for real-time database management, user authentication, cloud storage, and push notifications.
